SLS GOES STATESIDE!

New York Motorexpo, 13th – 18th September at the World Financial Centre.

Flagpoles and bases now available for rent in the US!

This September, SLS went stateside for the New York Motorexpo! Unable to find temporary flagpoles and bases in the States, the MotorExpo appointed SLS to ship and install their unique product at the World Financial Centre.

Rick Friedberger, SLS project manager for this contract said:

"It was great to see our flagpoles at such a prestigious event. We have retained all the poles and bases in New York. The poles are available to rent for events right across the United States; we are looking forward to being busy!"

Graeme Carver, Motorexpo President said:

"Having conducted a review of suppliers available to us in the United States we decided to again work with SLS and have them import their materials for our 2nd annual New York event. This built on the successful relationship we have enjoyed for a number of years and their flagpoles looked fantastic on the harbour side of the World Financial Center. We look forward to working with them on our future events."
